DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The Prior Art does not fairly teach or suggest a tire parameter sensing system – neither apparatus nor method of making - for sensing a parameter (e.g. pressure) of a tire of a vehicle including the combination of claimed elements, especially, a *power transmitting antenna* actuatable for producing a magnetic field at a location of the tire, a tire rim having first and second magnetically conductive surface portions which form a drop well located within the outer surface of the rim, the first and second magnetically conductive surface portions being angled relative to one another, and wherein the central axis of the coil antenna extends in a direction parallel to the first magnetically conductive surface portion and the first and second magnetically conductive surface portions guide magnetic flux of the magnetic field to the coil antenna.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record on the attached PTO Form 892 and not relied upon is considered pertinent to applicant's disclosure.
